PRESS ADVISORY

Colorado for Family Values has purportedly gathered the majority of anti-gay organization leaders from across America at the Glen Eyrie Conference Center on the vast campus of The Navigators, a fundamentalist organization based in Colorado Springs.

Meetings have just concluded this afternoon (Wednesday, April 18) at which it is believed they have developed their plans for the coming year as to how to eliminate Gays and Lesbians from viable participation in society and government through the process of vilification, dehumanization, mythbuilding and stereotyping.

It is Ground Zero's understanding that this meeting was made up of very high profile radical right leaders and elected officials from across the country, many of whom prefer to work in clandestine meetings to further their agenda of whitewashing America into their own monoculturalist and monoreligionist view of what we should all be, whether we like it or not.

From materials Ground Zero has been handed that were given out at the meeting, one cannot expect that these people will change their primary tactic, the building of hate and fear through disinformation and lies to develop support and a financial base to continue to develop their fascist style campaign of suppression and elimination across the country.

Ground Zero is a grass roots lesbian, gay, bisexual, transgendered and gay supportive moven
securing and maintaining basic civil rights for lesbian, bisexual, and transgendered citizens; and to unifying and promoting full participation of lesbian, gay, bisexual, and transgendered citizens into the community at large through the means of education, coalition, and visibility. Ground Zero exists in the Vatican of Fundamentalism--The Belly of the Beast, where in recent years over sixty international fundamentalist headquarters have moved, including Focus on the Family and, soon, COR.
